Different ways to prepare HiPP Baby Cereal

Preparation using formula

Boil fresh drinking water and allow it to cool down to about 50 °C*. Prepare approximately 200 ml of the HiPP formula you are currently using (as if you were preparing a feeding bottle).

Put 3-4 tablespoons (20 g) of HiPP Baby Cereal into a bowl.

Add the prepared formula and stir.

Leave to stand to thicken until it reaches the desired consistency. Check temperature.

Preparation as a dairy-free cereal with fruit

Boil 100 ml of water and allow it to cool down to approximately 50 °C*. Put 2-3 heaped tablespoons (12 g) of HiPP Baby Cereal into a bowl, add the water and stir. Add 100 g of HiPP Fruits (e.g. Williams Pear) and one teaspoon of rapeseed oil and stir. Leave to stand to thicken until it reaches the desired consistency. Check temperature.

Preparation using milk & water

Pour 100 ml whole milk and 100 ml of water¹ into a pot and bring to the boil. Allow it to cool down to approximately 50 °C*. Put 3-4 tablespoons (20 g) of HiPP Baby Cereal into a bowl. Add the cooled liquid and stir. Leave to stand to thicken until it reaches the desired consistency. Check temperature.

*For perfect solubility: do not use too hot water for preparing the cereal

¹ Adding water is necessary to reduce the protein content of cow's milk to a level suitable for children!
