

Our HiPP Baby Water comes from a source deep inside the Chiemgauer mountains and maintains its original purity: Our natural water is taken directly from the Siegsdorfer Petrusquelle and bottled immediately (as required by law).

Low in sodium and strictly controlled: Mineral water, which is suitable for the preparation of baby food, has to meet specific mineral levels and be low in sodium. Additionally, the water quality is consistently subjected to strict controls. Our HiPP Baby Water meets all these requirements, guaranteeing the impeccable quality of our mineral water.

HiPP Baby Water to ensure safety when feeding your baby:

- ✔ still, natural mineral water – in its original purity*
 - ✔ taken directly from the source and bottled immediately*
 - ✔ strictly controlled*
 - ✔ for preparation of infant formulae, paps and teas
 - ✔ to mix with HiPP juices
 - ✔ ideal thirst quencher
- *as required by law

Important: Every drink can cause severe tooth decay if sucked on constantly.

Therefore: Do not give your child the bottle as a soother or sleeping aid. Always hold the bottle yourself while feeding and encourage your child to drink swiftly. Brush your child's teeth regularly once they start breaking through. Get your baby accustomed to drinking from a cup from the 8th month.
